

MULTIGRIP RIVETS

**DOME HEAD - ALUMINIUM RIVET, STEEL MANDRE
SPECIFICATION 5052**

L

One rivet can be used in multiple material thickness, this reduces inventories and eliminates operator error. Stem is locked in shell, eliminating the risk of mandrel head vibrating loose while providing a weather resistant joint. The bulbing formation of the multi-grip rivet will fill slightly oversized holes, providing increased strength and vibration resistance.

NICKEL/COPPER ALLOY RIVETS MB
BUTTONHEAD - NICKEL/COPPER ALLOY RIVET, STEEL MANDREL
SPECIFICATION 400

This material gives excellent corrosion resistance for plumbing applications
 With increased shear and tensile strength it is one of the strongest rivets in the product range.

LSR - LOAD SPREAD RIVETS

ACD BUTTONHEAD - ALUMINIUM RIVET, ALUMINIUM MANDREL

The Avdel Bulbex[®] breakstem fastener is designed with a split tail formation, providing a much larger blind side bearing area against the rear sheet. This also allows for a wide variation in material thickness. The Bulbex blind breakstem fastener is ideal for use with plastic and low strength material.

BULB-TITE Blind Rivets - Dome Head
Aluminium Rivet, Aluminium Mandrel

Bulb-tite is a unique blind fastener designed to perform where there is a wide grip range and hole size variation. The three large bulbs on the blind side distribute the load over a large area to avoid damage to plastics, fiberglass, wood and other sensitive materials, while providing for maximum clamp-up of the parts. The clamp-up action is comparable to the compression of a nut and bolt at full torque.
